25th

Anniversary

PORT STOCKTON NURSERY

Calif.

In Appreciation---

We would like to express our deepest appreciation and our thanks to you, our customer, for your valued patronage these past twenty-five years. It has been a pleasurable experience to have been of service to you, whether in a large or small capacity.

Port Stockton Nursery was founded 25 years ago by Mr. Frank C. Raffel and wife Gertrude and was located at the same site as the present nursery now stands. Through the years, expansion was necessary until the present site, which comprises an area of two acres, was developed into our salesyard. A short distance from the salesyard, is situated about 25 acres of growing grounds, which produce all of our own nursery stock, except for a very few items. Mr. Raffel has originated many fine roses, some of which are: Banner, Stockton Beauty, Treasure Island, California's Favorite, Raffel's Pride, Marcia, Lavender Queen and others. A few years ago, three brothers, Arthur E., Floyd E., and Howard N. Nelson formed a partnership with Mr. Raffel. Prior to this time, they were employees at the nursery.

Again --- our grateful thanks to each of our many friends, and we trust that we shall have the privilege of serving you in years to come.

Gertrude Raffel

This new floribunda has inspired more enthusiastic superlatives than any rose we have ever grown. The slender, cerise buds, with their slightly ruffled petals edged delicately in silver, develop into glowing flowers of perfect hybrid-tea form. As the buds slowly open, the color lightens to a clear, luscious pink, and the golden stamens add to its charm. After several days, this long-lasting flower intensifies in color and becomes a deep rosey red.

Superior characteristics of this newest Raffel origination, are the clear luminous jewel tones, radiance of coloring, and perfection of form. The 2- to 3-foot plant is vigorous and bushy with handsome, deep green mildew-resistant foliage. There is a continuous production of clusters of delicately fragrant blooms from early spring until late fall. The huge panicles of bloom consist of many smaller clusters carried on 6- to 10-inch stems, dividing again so that each exquisite bud is borne individually on 2- to 3-inch stems, effecting an airy daintiness not found in other floribunda. Blooms will measure 2 to 3 inches when fully opened.

This rose is ideal for arrangements, perfect for corsages, beautiful in the garden. If you are seeking a perfect floribunda, you will like this one.

Beautify Your Garden with the World's Finest Roses

FALL 1955 • SPRING 1956

Our rose bushes are all good, healthy, field grown. Each bush is labeled true to name. If any prove otherwise, we will gladly replace them.

All but a few varieties of our rose bushes are budded on Odorata root stock. From tests conducted in many sections of the country, this root stock has proven the best, as hybrid-tea varieties budded on it outgrow and live longer than any other root stocks. We grow all the rose bushes offered for sale in this catalog at our nursery at Stockton. We also exercise the greatest of care in digging, packing, and shipping so that they get to you in the best condition possible.

We will replace any bushes that you receive from us that were damaged in shipping if notified within ten days, but do not replace good bushes that are planted and do not grow as there are too many soil and climatic conditions involved over which we have no control.

The first Spring after planting rose bushes, remove only old flowers, leaving all stems and leaves possible.

All our rose bushes, if given proper care, will bloom for you the first Spring and will continue all Summer and Fall. Climbing roses bloom very little the first year, but will be covered with bloom the second Spring.
